

BLUE CUBE

Ultra range benefits

01.

>33% Better Performance

Our own customer partners' data consistently report that they are seeing a reduction from 36 hours to >24 hours-33%-to blast freeze their products, utilising the Ultra Smart Hybrid units.

02.

4x more energy efficient

The Ultra range's tempering solution is up to 4 times more energy efficient than comparable units, utilising the advanced reverse cycle heat pump system.

03.

Support local, UK manufacturing

Our units are manufactured exclusively here in the UK, meaning a reduction in the lead times, including spare parts, plus a boost to the local economy.

04.

Reduce maintenance downtime and costs

Our units' gas defrost system reduces both maintenance downtime and associated financial costs as they remove the heaters.
